CONTENTS

No. 1 JULY, 1935

K. E. Mason and E. T. Ellison. The demonstration of oestrus in the vitamin A-deficient rat by supravital study of the vaginal smears. Two figures 1

S. A. Asdell and Mary F. Crowell. The effect of retarded growth upon the sexual development of rats 13

Marion Ammerman and Robert E. Waterman. Studies of crystalline vitamin B. IV. Injection method of assay. One figure 25

Robert E. Waterman and Marion Ammerman. Studies of crystalline vitamin B. V. The effect of graduated doses on growing rats. Seven figures 35

H. R. Guilbert. Factors affecting the carotene content of alfalfa hay and meal. One figure 45

C. M. McCay, Mary F. Crowell and L. A. Maynard. The effect of retarded growth upon the length of life span and upon the ultimate body size. One figure 63

Edwin P. Laug and Thomas P. Nash, Jr. Variations in urinary reducing substances of two normal dogs maintained on bread diets. Two figures 81

Paul H. Phillips, J. G. Halpin and E. B. Hart. The influence of chronic fluorine toxicosis in laying hens upon the fluorine content of the egg and its relation to the lipoid content of the egg yolk 93

Howard B. Lewis. *Editorial Review.* The chief sulfur compounds in nutrition 99

No. 2 AUGUST, 1935

T. S. Hamilton and H. H. Mitchell. A modification of the Sherman method of studying the multiple nature of vitamins, with an application to vitamin G 117

C. G. King and M. L. Menten. The influence of vitamin C level upon resistance to diphtheria toxin. I. Changes in body weight and duration of life. Two figures 129

Maud L. Menten and C. G. King. The influence of vitamin C level upon resistance to diphtheria toxin. II. Production of diffuse hyperplastic arteriosclerosis and degeneration in various organs. One plate (four figures) 141

RALPH BOGART AND J. S. HUGHES. Ascorbic acid (vitamin C) in sprouted oats. Two figures 157

ROBERT E. WATERMAN AND MARION AMMERMAN. Studies of crystalline vitamin B. VI. The effect of graduated doses on pigeons. Three figures 161

N. B. GUERRANT, ELIZABETH KOHLER, J. E. HUNTER AND R. R. MURPHY. The relationship of the vitamin D intake of the hen to the antirachitic potency of the eggs produced. One figure 167

JESSIE B. BRODIE AND FLORENCE L. MACLEOD. Quantitative experiments on the occurrence of vitamin B in organs. Two figures 179

CLARENCE L. ROBBINS. The effect of dinitrophenol on calcium and phosphorus metabolism 187

H. J. ALMQUIST, E. L. R. STOKSTAD AND E. R. HALBROOK. Supplementary values of animal protein concentrates in chick rations. Two figures 193

KURT W. FRANKE AND VAN R. POTTER. A new toxicant occurring naturally in certain samples of plant foodstuffs. IX. Toxic effects of orally ingested selenium. Five figures 213

KURT W. FRANKE. A new toxicant occurring naturally in certain samples of plant foodstuffs. X. The effect of feeding toxic foodstuffs in varying amounts, and for different time periods. Four figures 223

No. 3 SEPTEMBER, 1935

KURT W. FRANKE. A new toxicant occurring naturally in certain samples of plant foodstuffs. XI. The effect of feeding toxic and control foodstuffs alternately. Five figures 233

GEORGE E. FARRAR, JR., AND S. MILTON GOLDHAMER. The iron requirement of the normal human adult 241

E. J. COULSON, ROE E. REMINGTON AND KENNETH M. LYNCH. Metabolism in the rat of the naturally occurring arsenic of shrimp as compared with arsenic trioxide. One figure 255

WALTER H. SEEGERS AND H. A. MATTILL. The nutritive value of animal tissues in growth, reproduction and lactation. III. The nutritive value of beef heart, kidney, round and liver after heating and after alcohol extraction. Five figures 271

CALLIE MAE COONS AND R. R. COONS. Some effects of cod liver oil and wheat germ on the retention of iron, nitrogen, phosphorus, calcium and magnesium during human pregnancy. One figure 289

H. H. MITCHELL. The food value of ethyl alcohol 311

LEAH ASCHAM. A study of iron metabolism with preschool children 337

D. T. MAYER. Rat's milk and the stomach contents of suckling rats 343

No. 4 OCTOBER, 1935

W. F. Drea. Spectrum analysis of hen eggs and chick tissues 351

Nathan Rakieten. The basal heat production of the rhesus monkey (Macaca mulatta) 357

H. C. Sherman and H. L. Campbell. Effects of increasing the calcium content of a diet in which calcium is one of the limiting factors. Two figures 363

Amy L. Daniels, Mary K. Hutton, Elizabeth M. Knott, Olive E. Wright and Mary Forman. Calcium and phosphorus needs of preschool children. Four figures 373

Ruth Yeager and Jet C. Winters. The effect of deficient diets on the total ash, calcium and phosphorus content of bones 389

Paul H. Phillips, Honora English and E. B. Hart. The augmentation of the toxicity of fluorosis in the chick by feeding desiccated thyroid. One figure 399

H. R. Guilbert and G. H. Hart. Minimum vitamin A requirements with particular reference to cattle 409

A. G. Eaton, Shirley C. Cordill and J. L. Gouaux, with the technical assistance of Vera Clay. Is the work of the kidney, due to the excretion of urea, a factor in specific dynamic action? 429

Charles D. Kochakian and John R. Murlin. The effect of male hormone on the protein and energy metabolism of castrate dogs. Five figures ... 437

No. 5 NOVEMBER, 1935

E. B. Forbes, R. W. Swift, Alex Black and O. J. Kahlenberg. The utilization of energy producing nutriment and protein as affected by individual nutrient deficiencies. III. The effects of the plane of protein intake. Seven figures 461

Susan Gower Smith and Douglas H. Sprunt. Pathological skin changes in the tail of the albino rat on a diet deficient in vitamin G. Six figures 481

Versa V. Cole and George M. Curtis. Human iodine balance. Nine figures 493

Adelaida Bendaña and Howard B. Lewis. The utilization of inulin for growth by the young white rat. One figure 507

Harold S. Olcott, William E. Anderson and Lafayette B. Mendel. The effect of cereal diets on the composition of the body fat of the rat 517

Esther M. Greisheimer and F. W. Hoffbauer. The influence of diet on the glucose tolerance of the dog. Three figures 525

Albert G. Hogan, Robert V. Boucher and Harry L. Kempster. Adequacy of simplified rations for the complete life cycle of the chick. One figure 535

CLAY B. FREUDENBERGER AND FRED W. CLAUSEN. The effect of 1 per cent cod liver oil on the rat, with particular reference to the thyroid gland 549

LAFAYETTE B. MENDEL AND REBECCA B. HUBBELL. The relation of the rate of growth to diet. III. A comparison of stock rations used in the breeding colony at the Connecticut Agricultural Experiment Station. One figure 557

LAWRENCE L. LACHAT AND LEROY S. PALMER. The comparative rachitogenic property of oats and corn 565

No. 6 DECEMBER, 1935

HELEN A. HUNSCHER, FRANCES COPE HUMMELL, BETTY NIMS ERICKSON AND ICIE G. MACY. Metabolism of women during the reproductive cycle. VI. A case study of the continuous nitrogen utilization of a multipara during pregnancy, parturition, puerperium and lactation. Three figures 579

KURT W. FRANKE AND E. PAGE PAINTER. Selenium in proteins from toxic foodstuffs. IV. The effect of feeding toxic proteins, toxic protein hydrolysates, and toxic protein hydrolysates from which the selenium has been removed. Two figures 599

WALTER C. RUSSELL AND M. W. TAYLOR. The relation between the vitamin A and D intake by the hen and the output in eggs 613

F. W. QUACKENBUSH, W. H. PETERSON AND H. STEENBOCK. A study of the nutritive value of mushrooms. Five figures 625

V. G. HELLER, J. R. OWEN AND LUCILE PORTWOOD. The effect of the ingestion of saline waters upon the pH of the intestinal tract, the nitrogen-balance and the coefficient of digestibility 645

ROBERT W. HAMAN AND HARRY STEENBOCK. The differential antirachitic activity of vitamin D milks 653

WENDELL H. GRIFFITH. Studies on growth. III. B and G avitaminosis in cecectomized rats 667

WENDELL H. GRIFFITH. Studies on growth. IV. The vitamin B and G content of the body tissues of normal and experimental rats. Three figures 675

D. TOURTELLOTTE AND W. E. BACON. Variability of vitamin D response with temperature of environment. Two figures 683

H. B. PIERCE. *Editorial Review.* The absorption and utilization of carbohydrates 689
